Bauer Automate

Dear Hiring Manager,

I am excited to apply for the Junior Low-Code Developer position at Bauer Automate. With a background in software development and workflow automation, I am eager to contribute my skills in API integration, automation, and problem-solving to your innovative team.

During my time at Southern Alberta Institute of Technology, I developed AI-driven solutions such as an AI Cover Letter Generator and a Medical AI Chatbot, reinforcing my ability to build automated, user-friendly applications. Additionally, my experience in data processing, collaboration, and system optimization aligns well with the responsibilities of this role.

What excites me most about Bauer Automate is the opportunity to work in a collaborative environment focused on digital transformation. While I am new to Microsoft Power Platform, I am eager to apply my automation expertise and problem-solving mindset to develop impactful solutions.

I would welcome the opportunity to discuss how my skills align with your team's needs. Thank you for your time and consideration. I look forward to hearing from you.

Best regards,

Jooyoung Kim
