

JOOYOUNG KIM

•Calgary, AB, T2V 0H3 •1991.jooyoung@gmail.com •403.805.8264 •linkedin.com/in/1991jooyoung-kim

Aspiring junior full-stack developer with hands-on experience building AI-integrated web tools. Quick to learn, highly collaborative, and passionate about building secure and reliable features in teams. Especially motivated by challenges in cloud-native software, cybersecurity, and scalable platform development.

HIGHLIGHTS OF QUALIFICATIONS

- Built AI-integrated web applications using React, Tailwind CSS, and OpenAI/Gemini API with a focus on usability and performance.
- Implemented secure user authentication in mobile apps using Firebase including facial login for enhanced access control.
- Strong communicator and team player with hands-on experience in agile, collaborative development environments.
- Comfortable with Git and REST APIs; currently learning tools like Docker through coursework.

RELATED EXPERIENCE

MediHealth AI – SAIT Capstone Project 2 03/2025 – 04/2025

- Built a web-based health tool that analyzes user symptoms to suggest possible causes, treatments, and prevention strategies.
- Integrated an AI chatbot using Gemini API to deliver conversational guidance and redirect users to relevant health insights.

AI Cover Letter Generator – SAIT Course Project 02/2025 – 04/2025

- Developed a web application that generates personalized cover letters by extracting key skills from resumes and job descriptions using OpenAI API.
- Improved user experience with features like editable keyword previews, dynamic transitions and downloadable PDF generation.

Shift Solutions – SAIT Capstone Project 1 09/2024 – 02/2025

- Implemented secure user authentication in a mobile app including facial recognition login for added security and convenience.
- Collaborated with a cross-functional team to build a shift scheduling system supporting real-time data access and role-based access control.

WORK EXPERIENCE

Cashier – Sportech Indoor Golf, Calgary, AB 12/2024 – Present

- Assisted customers with the self-service golf system, ensuring smooth gameplay and resolving minor technical difficulties.
- Documented operational issues and customer feedback in Excel, enabling staff to track and address recurring challenges more efficiently.

EDUCATION

Software Development Diploma, SAIT, Calgary, AB 04/2025
